MRG CONSTRUCTION MANAGEMENT, INC.

MRG provides construction management, design/build, and general contracting services to a variety of commercial customers, including retailers, end users, developers, property managers, and private corporations to satisfy their potential tenant build-out, property improvements, and ground-up construction needs.

The success of MRG and its clients is the result of our wide range of construction experience, cooperative approach, and commitment to fostering healthy owner/contractor relationships by emphasizing communication and attention to detail throughout the pre-construction, construction, and close-out phases of each and every project.

MRG TEAM

MRG Construction employs a dedicated staff of individuals to provide a full range of construction management needs. In order to complete your project successfully, our team will fulfill all pre-construction requirements, subcontractor selection, construction management and initial scheduling.

The assigned project manager will be the point person for all project-related correspondence and inquiries. One of our highly qualified superintendents will provide full-time, on site construction supervision throughout the length of the project, including subcontractor coordination, final scheduling and quality control procedures, while ensuring all work conforms to the drawings and specifications. The project manager and site superintendent will both attend weekly project meetings with your team.
